Hot Tub and Spa		
We will provide one 30-50 Amp, 220V branch circuit for hook-up to an electric hot tub. The base price, as listed below, includes: disconnect (if required), grounding up to current NEC standards, and any and all connections. The per foot price as listed below includes the required labor and any material necessary to complete the hook-up. The per foot price includes copper wire. The base price does not include GFCI protection. There is a slight possibility that your spa will come with the GFCI protection if it does not we will provide the appropriate breaker at an additional charge.
